

PLANT UNIT

Word Wall

Created by Vilena Hamilton

THANK YOU!

Thank you for downloading this product!
I hope that you find it useful!
Word Wall activities increase comprehension and help students see connections between words and concepts.
I've also included the definitions for each term. You can glue them back to back or get the students match the terms with their definitions.

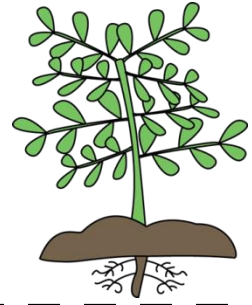

This product was created with the help from:

is a living thing. There are lots of different kinds, such as trees, shrubs, herbs, bushes, mosses and ferns.

supports the plant above the ground and carries water and minerals up from the roots to the leaves.

are plant parts that grow from the stem. They take in the air and light a plant needs.

are underground parts of a plant that hold the plant in place and take in water and minerals from the soil.

is a plant part that makes seeds.

is the building block of all living things.

is a green pigment in the leaves of plants.

It helps the plant use energy from the sun to make food.

is the food-making process in plants.

is the first stage of growth in many plants.

to begin to grow; give off shoots or buds.
